## **Max-Planck-Institut für Kernphysik (MPIK) Heidelberg, July 13-17, 2020**

PASCOS 2020, the 26th International Symposium on Particles, Strings and Cosmology will be hosted at MPIK in Heidelberg from July 13-17, 2020. The aim of the symposium is to review the recent progress in particle physics, string theory and cosmology, with particular emphasis on their interrelation. While the conference is mainly aimed at theorists, there will be a strong experimental component, with discussion of new results and future experiments.
